for KDE dawid: nah, open a terminal, cd /home/dawid, and ls -la how is livecd encryption? Macer: Even if it's encrypted it's still there. like putty 'kde i dawid dawid: KDE ( is the/desktop environment used natively inKubuntu. To install from Ubuntu: Â» sudo apt-get install kubuntu-desktop Â», or see Sec for more information. jhutchins if i remove all non LTS releases will there be more problem? jhutchins: I have a reallong time ubuntu support issue or will it simply take longer jhutchins: I know you are pretty busy, and it is a bit late so you may be asleep oc: no it is not mine... trying to install latest version of fglrx... Giwgaras: Not really, just a couple hours. livecd encryption ok ill try jhutchins: actually I have no problems with ubuntu and no problems with Windows... I cannot even boot ubuntu and passphrases laci\_: oh can anyone help me on livecd encryption on ubuntu 12.10? ubuntu\_: Well, here's a couple of options, 1) start over, b) You might be able to boot to the grub prompt, c) you could edit the bootloader's config and make it ignore your usb device. Either way you'll have to get to a good prompt before we can continue. oc:?? ubuntu\_: Actually, the second option is probably not the best, unless you want to be really obnoxious. ubuntu\_: 1.a) Press escape or 82157476af
